

# ISCARSAH

International Scientific Committee on the Analysis and  
Restoration of Structures of Architectural Heritage

## ISCARSAH Webinar - Analysis to Action: Current ISCARSAH Initiatives

The International Scientific Committee International Scientific Committee on the Analysis and Restoration of Structures of Architectural Heritage (ISCARSAH) has achieved significant momentum in recent years—launching working groups that transform our members' expertise into practical advances for heritage conservation. Join us to hear directly from our four working groups as they present their current initiatives: Climate Change Impacts on Heritage, Building Codes and ISCARSAH Principles, Cataloguing of Masonry Issues Worldwide, and Lessons Learned from Recent Projects.

Whether you're interested in joining or simply in how structural engineering preserves our architectural heritage, this webinar will offer insights into what we do and where we're headed. The webinar will be followed by a Q & A session. The event is part of a larger ISCARSAH-hosted webinar series, focused on critical topics of international cultural preservation of heritage buildings, which can be found on our YouTube channel [here](#).

**Webinar time: Friday December 5<sup>th</sup>, 2025 2:00 – 3:30 PM UTC**

### Discussion Moderator

**Evan Speer**  
Engineer, USA

**Building Codes and ISCARSAH Principles:  
Harmonization of Safety Issues**  
**Mustafa Humo**  
Engineer, Bosnia and Herzegovina

**Climate Change  
And Adaptation**  
**Rebecca Napolitano**  
Engineer and Professor, USA

**Examples: Lessons Learned From  
Recent Projects**  
**Kai Weise**  
Architect and Planner, Nepal

**World Catalogue  
Of Masonry Types**  
**Filippo Casarin**  
Engineer, Italy
